### How to switch between Skuku roaming And Skuku global VoIP / world mode :

- Switching between skuku Roaming and skuku VoIP/World service by click on 'Options'> then Choose 'Skuku roaming' OR 'Skuku World' at the menu item.

### **Receiving a call:**

1. If case of an incoming Skuku call a notification will appear allowing you to take or reject the call  
It's only possible to take Skuku calls when the Skuku client is the active application
2. If Skuku client ring indicates that there's an incoming call while Skuku client is in the background you'll have to switch manually to the Skuku client.

This might change in future Skuku client versions.

### **Sending a Skuku to Skuku chat message Accessing Incoming/Outgoing messages:**

- Skuku client is now connected with the general phone SMS log, existing messages from the log appear in Skuku message log and new Skuku messages are also recorded in the general message log.
- This screen allows seeing past messages: content, recipient/sender and time.
- Clearing the message history is possible by 'Options'>'Clear Incoming' / 'Clear Outgoing' menu item,

Since version 1.32 this also clears general phone SMS logs.

1. The 'Message' screen is accessible trough the 'Options'>'Chat/IM' menu item
2. Scroll to 'Incoming Messages / 'Outgoing Messages' entry from the option list and press 'Open.'
3. In the 'To' field enter the Skuku username you wish to send the message to.
4. Enter the message text in the text field.
5. Press 'Send', you will receive a notification indicating wherever the message was sent successfully or not.

### **Receiving a Skuku chat message :**

1. When a Skuku chat message is received the application will go to the 'Message' screen allowing you to read the chat message and replay if desired.
  - There's currently no chat history being saved, hence it's not possible to read previously saved messages.

### **General notes:**

1. It's possible to exit the application at any time through the 'exit' option in the menu.
2. It's possible to return to the 'Call' at any time through the 'back' option in the menu.
3. Wherever there's an input field it's possible to change the input language through the 'writing language' option in the menu item.
